Curtains

Curtains are very important elements of a functional interior. Decorative Curtains not only enhance the beauty of the interior spaces but also bring in a lot of warmth and coziness to space. At Curtain Spa, we have a wide range of curtain selection of different materials and designs. Be it a traditional design to add to the royal elegance of your living room or pastel prints to brighten up your bedroom. We believe that every room in a house is different and requires special attention. We spend time with our customers to understand what they are looking for and customize curtains to suit their needs.

Wooden Flooring

Wooden Flooring is one of the best options available to make your home really attractive. Real wood flooring comes in textured, smooth, hand-distressed, and oiled finishes and is durable and hard-wearing. Solid wood flooring is a natural and organic option that is very tough and long-lasting. Choose classical hardwood floors in a variety of wood species to get just the right color. Also, laminate flooring is a great economical choice that delivers the look. Vinyl flooring is an ideal choice for bathrooms, utility rooms and kitchens, and the best part is that you'll have money left to add a tile backsplash or beautiful crown molding.

Wall Covering

Plain walls in the same old colors don't evoke any emotion in us. Wallpapers in a varied range of colors, designs, patterns, and textures add character to a room and makes it stand out. For instance, if you are an old soul and want your home to reflect the same, a victorian design or a vintage rose wallpaper design will help you portray the same. At Starline Design, we have a wide range of wallpapers that cater to all kinds of clients' requirements. Want something custom made? We will help you out with that too.

VINYL FLOORING

WONDERFLOOR

Vinyl flooring is durable and can withstand heavy foot traffic. It is comfy under flooring and shrinks noise, which is advantageous to owners with children or dogs. It is also less expensive than other flooring options and simpler to install and maintain. Vinyl is considered by many as a highly resilient material that, when properly installed and maintained, can endure for ten to twenty years. Solid and composite vinyl tiles are homogeneous, with colors permeating each layer, rendering them more resistant to scratches.
